

## Data weighting StudentSurvey.ie 2026

The StudentSurvey.ie Steering Group has agreed an approach to the calculation of survey weights for the taught StudentSurvey.ie 2026.

It should be noted that 2026 represents a stand-alone year for StudentSurvey.ie data as it only includes year cohorts of first year undergraduates, final year undergraduates and taught postgraduates. From 2028, all undergraduate and taught postgraduate student cohorts will be included in the survey population.

As a result, the Steering Group has decided that survey weights will **not** be calculated for 2026 data, and all national reporting will use unweighted data only.

A weightings approach for 2028 taught StudentSurvey.ie will be considered and agreed at a later date.
